Complete Conveyor Solutions

Mining Quarry Solves Carry-Back Problem with TORO® Belt Cleaner

A large trap-rock quarry solved their carry-back problem using ASGCO's Toro belt cleaner. The application is on their number one conveyor that exits under the primary crusher and the carry-back before the cleaner made it a daily task to clean it out. Now with the Toro installed the carry-back is down to a bare minimum. The removable blade cartridge design also makes it a lot easier for maintenance to remove and change out the blades.

The **TORO** secondary belt cleaner is an effective flexible secondary belt cleaner that is also suitable for reversing conveyor belts. The cartridge blade system allows for easy blade change-outs and is available with 3 different blade styles and 2 different tensioners depending on the application.

- **Complete Cleaning** - with our combination of 6" (150mm) cleaning blades that are either tungsten carbide, AR 400 steel or urethane, will be recommended based on your specific application, are independently tensioned by its own rubber cushion to maintain a consistent blade-to-belt pressure.
- **Blade Cartridge** - allows for easy change out of scraper blades from either side of the conveyor.
- **Designed for Reversing Conveyors** - such as shuttles or conveyors that roll back, trippers, due to its unique two-way rubber cushions.

Blade Cartridge
Allows for easy change out of scraper blades from either side of the conveyor.

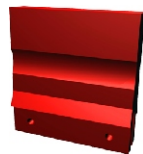

Also available with these blades:

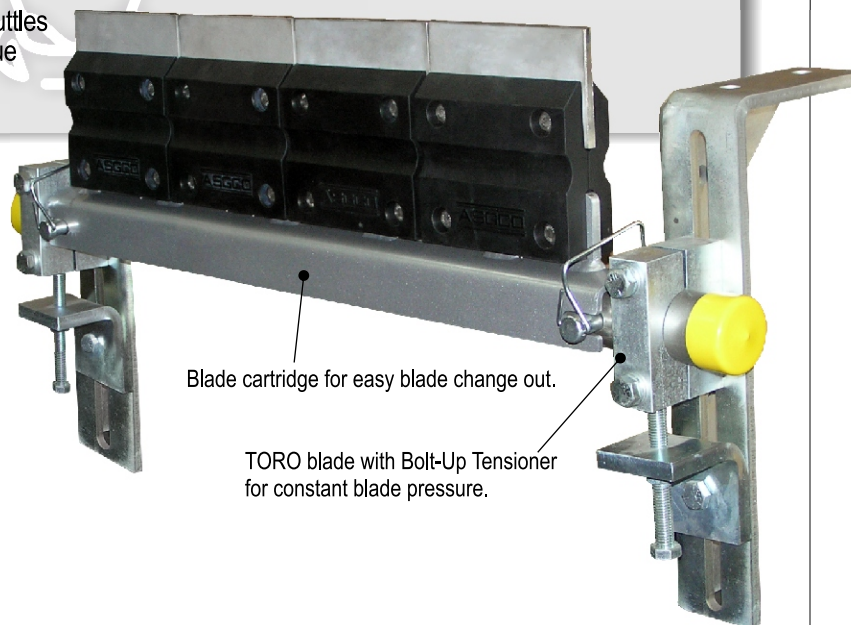

TORO C-Tip

TORO F-Tip

TORO Urethane

Blade cartridge for easy blade change out.

TORO blade with Bolt-Up Tensioner for constant blade pressure.

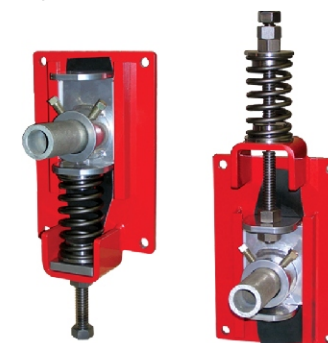

Toro secondary belt cleaner installed on the primary belt off the main crusher

Also Available with Duo-Spring Tensioner®

Unique design ensures optimal blade tension throughout the entire life of the blade
